

AECOM

MAJORS: Civil Engineering, Civil Engineering & Construction Management, Environmental Engineering, Geological Engineering

TITLE: Entry Level Traffic/Planning Engineer

JOB DESCRIPTION:

AECOM is seeking an entry level traffic/planning engineer to add to our Middleton, WI office.

Responsibilities will include:

- Route location planning and feasibility studies
- Traffic impact studies
- Traffic management plans
- Environmental assessments for transportation facilities
- Traffic data collection and analysis
- Intersection control evaluations
- Safety assessments and corridor reviews
- Design of traffic control devices.

An enthusiastic individual eager to face challenges, assume responsibility for their efforts, and take pride in a job well-done is best qualified to meet the demands of this position. Candidates are expected to apply their technical training to develop solutions, be willing to work within a group, and learn new skills. Computer literacy and a demonstrated ability to learn quickly are a requirement. Candidates must be able to adjust to short-term assignments. Organizational skills including the ability to communicate with clients and agencies both verbally and through written correspondence are a must.

Qualifications

BS or MS in Civil Engineering with a transportation focus.

Successful candidates will have 0 - 2 years experience in traffic engineering or transportation planning projects

MicroStation experience preferred.

Experience a plus. EIT a plus.
