MAJORS: Chemical Engineering, Civil Engineering, Civil Engineering & Construction Management, Computer Engineering, Computer Science, Electrical Engineering, Materials Science, Mechanical Engineering

TITLE: Major- Mechanical Engineers (1 position)

JOB DESCRIPTION:

Job Responsibilities- Boiler and Piping engineers are responsible for providing fleet-wide support to generating plant staffs and projects, ranging from coal, oil, gas, and wind generating plants to pumped storage, biomass and waste-to-energy facilities. You may supervise or mentor other engineers and specialists and will need to travel to suppliers in the US, Canada and possibly overseas.

TITLE: Major- Mechanical Engineers (1 position)

JOB DESCRIPTION:

Job Responsibilities - Apply your power plant expertise with a dynamic industry leader. This is an excellent opportunity to join an industry leader and be responsible for developing and implementing solutions or plant modifications that address plant operating or maintenance issues. You will work with some of the best engineers and technical specialists in our industry.

Summer internships for electrical engineers for our electrical distribution and system control department.
