

The Master of Science in Artificial Intelligence (MSAI) program offered at Northwestern University's McCormick School of Engineering is a great platform for discovering new and exciting career opportunities. According to [Forbes](#), there is a *huge* skills crisis due to the AI talent shortage not matching up with demand.

Graduates with an MSAI degree will earn a valuable education from a premiere institution that will prepare them for careers such as:

- Data Scientist
- Machine Learning Engineer
- R&D Engineer
- Business Intelligence Developer
- Computer Vision Engineer
- Video Game Programmer

The [curriculum](#) is a 15-month, 5 quarter program that combines classwork, internships coordinated by the program, research opportunities within Northwestern AI labs and a final capstone project. Students will start the program in the fall quarter and will take most of their classes together as a cohort.

Application deadlines are quickly approaching:

- February 1: Students requiring a visa (final deadline for international students)
- February 15: Domestic students
- April 30: Final deadline if seats are still available

You may send us questions via [email](#), or we welcome you to schedule a brief phone appointment with our associate director, Kim Kieras, Monday-Thursday, 10-4pm CST. Simply respond to this message to request scheduling.

We hope you have an interest in learning more about the MSAI program, and look forward to hearing from you soon.
