

Engineering Co-Op

Why Watlow?

The world's leading companies start with Watlow. Watlow®, a privately owned global company, is the industry leader in the design, manufacture and integration of complete thermal systems including electric heaters, temperature sensors, temperature controllers, power controllers and supporting software.

At Watlow, we are constantly driven to do more to help our customers. We take on big technical challenges. We are committed to projects that help our fellow human beings and we strive to learn more. From single components to high performance systems, we bring our thermal expertise to numerous applications, including semiconductor processing, energy processes, diesel, foodservice equipment, life sciences and others.

Tell me more about the Co-Op!

The **Engineering Co-Op Program** is a **6-8 month commitment for current undergraduate students to take a semester off** of classes to work and apply class room theory at a Watlow manufacturing site. The Engineering Co-Op will focus on growing and developing technical skills in design, testing, automation, product development.

You will collaborate with mentors, team leaders, project leaders, and other engineers while being **hands on** with strategic projects to the business.

We have opportunities that will begin in June 2019 and January 2020 at multiple facilities including:

- Richmond, IL
- Columbia, MO
- Hannibal, MO
- St. Louis, MO
- Winona, MN

Who are we looking for?

Innovators & Problem Solvers – Our customers come to us looking for the next right answer. This is your opportunity to exercise creativity and push the boundaries by participating in the creation of new products and technologies.

Team Players & Collaborators – Solving the world's toughest thermal challenges is hard and involves our brightest minds working together cross-functionally to find solutions. We are much stronger as a team. We're all in this together.

Initiators – Love having the autonomy to make decisions? Good – because we do too! We're looking for self-driven individuals who aren't afraid to ask questions, make mistakes, and leap into the heart of a project.

Technical Expertise — This is where your true geek should really shine through. Mechanical? Electrical? Embedded software? All of the above? Yep, this is where the innovation all starts.

What are the qualifications to apply?

- Currently pursuing a bachelor's degree in mechanical, electrical engineering, electronics, computer engineering or a related engineering degree
- Must be at junior status by the start of the co-op in June 2019 or January 2020
- Availability to start in June 2019 or January 2020
- Available to take 6-8 months off of school to work at a Watlow facility
- Able to relocate to a Watlow location for the duration of your co-op. Housing stipend will be provided.
- Able work in the U.S. legally without employment sponsorship

Please only **apply to one posted co-op position** to be reviewed for consideration, no need to apply to multiple.
If you are selected to move forward in the process, your location preference will be discussed in future conversations.

Watlow thanks all those who apply.
Only those who are best qualified may be contacted for an interview.

Watlow is an Equal Employment Opportunity Employer including Protected Veterans and Individuals with Disabilities
